

# COMPACT SCP

Plate Mounted Axial Flow Fan

# COMPACT SCP

## Product Overview

- 10 standard sizes from 250mm to 800mm
- Air volume flow rates up to 5.61 m<sup>3</sup>/s
- Static pressures up to 401 Pa
- Highly efficient, lightweight induction motors
- Fully speed controllable
- Available in **AC** & **EC**

**Featuring our high efficiency Series 1 impeller, the Compact SCP makes light work of handling large volumes of air against low resistance. The fan design, construction and finish provide a strong, durable and weatherproofed range.**

### Intelligent Design

Compact low profile design suitable for vertical or horizontal mounting.

### Easy Installation

A fitted IP55 terminal box allows the fan to be positioned conveniently to incoming electrical inputs.

### Impellers Designed For Efficiency

Impellers are adjustable pitch aerofoil with blades made from high quality GRP. Combined with increased blade chord and twist, we have achieved 7% higher efficiency, reducing overall energy consumption. Increased blade root reduces stress levels making our range of impellers ideal for arduous fan applications.

### Corrosion Resistance

Specially treated against corrosion, powder coated with polyester epoxy paint.

### Controllability

A range of transformer voltage controllers and inverters are available for AC units. IE5 EC fans can be directly connected via DC voltage 2 to 10V, DC current 4 to 20mA, Frequency 10 to 95% or a potentiometer. Both AC with Inverter and EC provide significant cost-savings through lower energy consumption.

### Warranty

Each SCP has a 12 month warranty.

### Construction

Constructed from mild steel and suitably treated to ensure full corrosion protection. Guards are epoxy powder coated. Fan plates and motors are finished in a powdered coated polyester epoxy paint in pastel beige.

### Motor

AC motors possess greased for life ball bearings with fixed speed operating temperatures of between -20°C and +70°C and speed controlled operating temperatures of -20°C and +50°C. High efficiency EC motors comply with the efficiency level IE5 for operating temperatures up to +60°C EC.

### Typical Applications

- Factories
- Sports Halls
- Shops
- Industrial Units
- Warehousing
- Schools
- Kitchens

Data provided is at standard air density of 1.2 kg/m<sup>3</sup>.

Data in accordance with ErP 327/2011 of the European Parliament. Measurement category used to determine energy efficiency: A. Peak Amps @ 230V / 1PH / 50Hz.

The overall A-weighted sound pressure level is at a distance of 3m with spherical free-field propagation. It is expressed in dB re-20μPa and is presented for comparative purposes only.

Data provided is at standard air density of 1.2 kg/m³.

Data in accordance with ErP 327/2011 of the European Parliament. Measurement category used to determine energy efficiency: A.

A variable speed drive is integrated within the fan.

Peak Amps @ 230V / 1PH / 50Hz.

The overall A-weighted sound pressure level is at a distance of 3m with spherical free-field propagation. It is expressed in dB re-20µPa and is presented for comparative purposes only.

Data provided is at standard air density of 1.2 kg/m³.

Data in accordance with ErP 327/2011 of the European Parliament. Measurement category used to determine energy efficiency: A.

A variable speed drive is integrated within the fan.

Peak Amps @ 230V / 1PH / 50Hz.

The overall A-weighted sound pressure level is at a distance of 3m with spherical free-field propagation. It is expressed in dB re-20µPa and is presented for comparative purposes only.

# AC ELECTRONIC CONTROLLER

## Accessories

- Stepless speed control allows precise fan speed selection
- Provides easy adjustment of fan duty for commissioning purposes
- TK versions offer means of motor protection via motor thermal contact
- IP51 enclosure
- Stepless speed control
- Minimum and maximum speed pre-set facility
- Suitable for operating temperatures up to 40°C
- Fitted motor protection fuse
- Suitable for two or three wire control

### Overview

TK versions are for use with fans fitted with thermal cut-out protection. In the event of the thermal cut-out, opening the controller will switch off and the trip indicator will be illuminated. Units are complete with illuminated on/off and start button. The start button must be pressed to start the controller once on/off switch is in the on position.

### Single Phase 220V to 240V / 50Hz

Product Code	Max Peak Current Amps	Weight kg	IP Rating
149-EL31	3	0.35	IP51
149-EL61	6	0.40	IP51
149-EL101	10	0.80	IP51

For controllers with TK function add suffix TK, EL21, EL41 and EL101 are not available with this option.

# EC ELECTRONIC CONTROLLER

## Accessories

- EC Type fans
- Variable Speed Drives (Inverters)

Product Code
149-POT-10

# ELTADRIVE VARIABLE SPEED DRIVES

## IP20

- Up to 22kW
- Built in PI control, EMC filter (C1) & brake chopper
- Application macros for industrial fan operation
- Bluetooth® connectivity
- Controls multiple motor types: IE2, 3, 4, IM, PM, BLDC and SynRM
- Operates up to 50°C

### Overview

Compact, robust and reliable general purpose drive for panel mounting.

### Simply Power Up

Eltadrive E3 provides precise motor control and energy savings using the factory settings. Simply power up and the drive can immediately deliver energy savings. 14 basic parameters allow simple adjustment for your application if required, with up to 50 parameters available in total for a highly flexible performance.

### Power Supply

Connects at top.

### Fast Connection

5mm rising clamp terminals with captive screws.

### Quick Reference

Integrated help card.

### Modbus RTS & CANopen

On board as standard.

### SmartStart

Rapid parameter cloning and Bluetooth® PC interface.

### Motor Supply

Connects at base.

### Dimensional Data

Model	Size	Height	Width	Depth	Weight kg	Fixings

# ELTADRIVE VARIABLE SPEED DRIVES

## IP66

- Up to 7.5kW
- Conformal coating as standard
- Switched or Non-Switched

### Overview

Enclosed drives for direct machine mounting, dust-tight and ready for washdown duty.

### Dust Tight Design

Install directly on your processing equipment and be sure of protection from dust and contaminants.

### Washdown Ready

With a sealed ABS enclosure and corrosion resistant heatsink, the Eltadrive E3 IP66 is ideal for high-pressure washdown applications.

### Eltadrive E3 IP66 Switched

Simply wire up the drive, turn the inbuilt potentiometer and the motor will start running - allowing immediate energy savings.

### Coated Heatsink as Standard

Ideal for hygiene based operations requiring washdown such as food & beverage.

### Fanless Heatsink

For reliable, cost effective operation.

### Local Speed Potentiometer

### Run Reverse / Off / Run Forward Switch

### Lockable Mains

Disconnect / Isolator.

### Dimensional Data

# TRANSFORMER CONTROLLER

## Accessories

- IP40 enclosure
- Five speed stepped control
- Illuminated on/off switch (single phase units only)
- Fitted Motor Protection type D MCB (single phase units only)
- Suitable for operating temperatures up to 40°C
- Ideal for environments where noise is a primary consideration as these controls do not create magnetic hum associated with some step-less forms of speed control

### Features & Benefits

A range of transformer voltage controllers used to provide five speed step control of single phase or three phase motors where the peak current of the motor does not exceed the rating of the controller. Speed control is via selector switch. Single phase units are complete with illuminated on/off switch.

#### Single Phase 220V to 240V / 50Hz

Product Code	Max Peak Current Amps	Weight kg	IP Rating
<a href="#">149-TC18</a>	8	6	IP40
<a href="#">149-TC110</a>	10	7	IP40

#### Three Phase 380V to 415V / 50Hz

Product Code	Max Peak Current Amps	Weight kg	IP Rating
<a href="#">149-TC33</a>	3	12	IP40
<a href="#">149-TC310</a>	10	25	IP40

# WALL COWL

## Accessories

- Protects fan openings prevailing weather conditions
- Minimises resistance to airflow
- Manufactured from GRP - colour (goose wing grey) impregnated into gel coat
- Complete with integral bird screen (galvanised mesh)

Product Code	A	B	C	Grille Area m <sup>2</sup>	Weight kg
<a href="#">SWC25/31</a>	500	410	325	0.088	2

<a href="#">SWC56/63</a>	935	815	555	0.345	10

Dimensions are in mm.

# WALL COWL

## Cowl Pressure Drop Curve

- 1 SWC25/31
- 2 SWC35/40
- 3 SWC45/50
- 4 SWC56/63

Determine pressure loss against required flow rate and add pressure loss value to system design pressure, verify that fan selection can accommodate extra pressure loss.  
Original design: flow rate (m³/s) and pressure (Pa), with cowl becomes flow rate (m³/s) and (pressure (Pa) + pressure loss (Pa) from curve).
